关于本册 · About this volume

第三册 · 高级应用（B2 → C1） 是全套书学术性最强的一册：科学研究、科技与人工智能、环境与能源、医疗、农业、经济、政府政策、历史与社会变迁、伦理与决策、创新、人口与家庭，以及两个“学术工具”单元——**学术动词**（Unit 38）和**抽象名词**（Unit 39）。

这一册的重点：

- **阅读优先**：这一册的很多词首先是为了**读懂** IELTS 学术阅读而学的。不需要把每个词都用进作文，但看到时要能迅速、准确地理解。
- **学术动词和抽象名词是“万能工具”**：Unit 38 和 39 里的词会出现在所有话题中。建议这两个单元学两遍：第一遍在本册开头，第二遍在本册结尾。
- **事实要准确**：本册部分重点词附有简短的知识背景（研究、数据、历史事件）。这些内容经过核对，但数据会随时间更新；在写作中引用时，用 *around / about / millions of* 这类近似表达更稳妥。

建议节奏： 每周 2 个单元，约 7 周完成。学完每个话题单元后，找一篇相关的英文文章（如 BBC、The Guardian、National Geographic 的科普或新闻），在文章中标出你在本单元学过的词——在真实语境中“重逢”是最有效的复习。

全套结构 · The series

Science, Research & Evidence

科学、研究与证据

本单元 65 个词条 · ★ 重点 14 个

IELTS 学术阅读中有相当比例的文章来自科普和学术期刊。读懂它们，需要熟悉**科学研究的“流程词汇”**：假设、实验、样本、结果、验证。本单元同时帮助你分清几组关键概念：*theory / hypothesis*、*correlation / causation*、*prove / suggest*。

1 · The research process · 研究过程

★ 重点词

27.1 **hypothesis** *n.*
/haɪˈpɒθəsɪs/
写作

假说；假设（复数 hypotheses）
搭配 form/test a hypothesis
*The scientists tested the **hypothesis** that sleep improves memory.*
词族 hypothetical (adj.)

hypothesis 是一个有待验证的、具体的预测；**theory** 则是经过大量证据检验、能解释许多现象的系统性解释（如 *the theory of evolution*）。日常英语中 *It's just a theory* 意为“只是猜测”，但在科学中 *theory* 的地位远高于“猜测”。

27.2 **theory** *n.*

理论；学说
搭配 in theory · a scientific theory
*Einstein's **theory** of relativity changed physics.*
词族 theoretical (adj.) · theoretically (adv.)

27.3 **experiment** *n. / v.*

实验；试验
搭配 conduct/carry out an experiment · experiment with/on
*They conducted an **experiment** to test the new material.*
词族 experimental (adj.)

★ 重点词

27.4 **researcher** *n.*

研究人员
***Researchers** at Oxford University published the study.*
词族 research (n./v.)

research 作名词不可数：× *a research / researches* → ✓ *a piece of research / a study / some research*。动词搭配：*research into/on sth*。

★ 重点词

27.5 **study** *n.*

（一项）研究
搭配 a recent study · a long-term study
*A recent **study** found that teenagers need more sleep than adults.*

阅读中 *a study* 几乎总是“一项研究”，不是“学习”。*A study found/showed/suggested that...* 是引述研究的标准句型。

27.6 **method** *n.*

方法
搭配 research methods · scientific method
*The scientific **method** involves observation, hypothesis and experiment.*
词族 methodology (n., 方法论) · methodical (adj.)

27.7 **observe** *v.*

观察；注意到；遵守
搭配 observe behaviour · observe the rules
*Scientists **observed** the birds for six months.*
词族 observation (n.) · observer (n.)

★ 重点词

27.8 **measure** *v. / n.*

测量；措施

搭配 measure sth accurately · take measures to do sth

*We **measured** the temperature every hour.*

*The government took **measures** to reduce pollution.*

词族 measurement (n.)

measure 作名词时最常见的意思是“**措施**”：*take measures / safety measures / preventive measures*，写作高频。

27.9 **variable** *n. / adj.* 写作

变量；可变的

搭配 control the variables

*Temperature was the only **variable** in the experiment.*

★ 重点词

27.10 **control group** *n.* 写作

对照组

*The **control group** did not receive the medicine.*

实验设计的基本概念：把受试者随机分成 *experimental group*（实验组）和 *control group*（对照组），比较两组差异。阅读题常考这个设计逻辑。

27.11 **participant** *n.* 写作

参与者；受试者

搭配 study participants

***Participants** were asked to keep a sleep diary.*

词族 participate (v.) · participation (n.)

27.12 **laboratory** *n.*

27.13 **findings** *n.* 写作

*The **findings** were published in a medical journal.*

★ 重点词

27.14 **result** *n. / v.*

结果；导致

搭配 as a result · result in · result from

*The **results** of the experiment were surprising.*

result in = 导致（原因 → 结果）；*result from* = 由……引起（结果 ← 原因）。*Smoking results in disease* = *Disease results from smoking*。方向别搞反。

27.15 **publish** *v.*

发表；出版

搭配 be published in a journal

*The study was **published** in the journal *Nature*.*

词族 publication (n.) · publisher (n.)

搭配 replicate a study/results

*Other scientists could not **replicate** the results.*

词族 replication (n.)

可重复性（replication）是科学可信度的核心。心理学界所谓的“可重复性危机”（replication crisis）指许多著名研究在重复实验时无法得到同样结果。读到“一项研究表明……”时，要想到：这个结果被重复验证过吗？

27.19 **breakthrough** *n.*

证明；结果是

搭配 prove that... · prove to be

*It is difficult to **prove** that the drug caused the illness.*

*The test **proved** to be harder than expected.*

词族 proof (n.)

科学写作中很少说某事被 *proved*（证明了），更常说 *suggest / indicate / show*。写作中用 *prove* 要非常谨慎——一项研究通常只能**提供证据**（provide evidence），不能“证明”。

27.27 **disprove** *v.* 写作

*No one has been able to **disprove** the theory.*

UNIT 39 C1 · 高级应用（重点单元）

Abstract Nouns for Academic English

学术抽象名词

本单元 50 个词条 · ★ 重点 13 个

学术英语喜欢把“动作”和“性质”变成名词（名词化，*nominalisation*）：不说 *because people are aware*，而说 *because of greater awareness*。抽象名词能让句子更紧凑、更客观——但也更难读懂。本单元精选在 IELTS 阅读和写作中最“扛事”的抽象名词，每个都配上它最常用的搭配。

🧩 构词规律 · Pattern

名词化：学术写作的“压缩”技巧

Prices increased rapidly, which worried consumers. → *The rapid **increase** in prices caused **concern** among consumers. If cities grow, they need more water.* → *Urban **growth** creates greater **demand** for water.* 名词化后，句子的主语从“人”变成了“概念”，语气更客观。但不要过度使用，否则文章会变得沉重难读。
